

The Assistant Secretariat for Prevention and Disease Control of the PRDOH administers the MCH/CSHCN programs. In Puerto Rico, the Title V Program supports direct services not covered by the GIP such as the provision of anticonceptives for low income population and subspecialty services for CSHCN. Title V funds are also used to support needs assessment and other activities geared to improve the health status of WCBA, Infants, Children, adolescents, and CSHCN. Among the most relevant programs which are implemented with the Title V funds we want to highlight the following: The Home Visiting Program, and the Comprehensive Adolescent Program. The Title V provides leadership and supervision to other related programs, such as SSDI, Healthy Start, Early Intervention, Abstinence Education, Prenatal Alcohol Screening, Medical Home and the Universal Newborn Hearing Screening.
